To whom it may concern,

This is to certify that EU importers of Plasti Dip products are not subject to registration under Regulation (EC) 1907/2006, commonly known as the EU REACH Regulation, until the importer exceeds 1 metric tonne of substances listed on the SOS. Until that time, ingredients that are not disclosed on the Plasti Dip SDS can be excluded from the volume calculations for Plasti Dip sourced products.

Importers are reminded that it is their responsibility to track the volume of substances imported and to notify their distributor prior to exceeding 1 metric tonne of an individual substance if they require assistance with meeting their registration obligations.

To facilitate this tracking, importers can initially refer to the composition of the ingredients disclosed on the SDS for the products they are importing. If the importer is not exceeding 1 ton of any of the listed ingredients, then there will be no registration obligation of any of the ingredients that are not shown on the SDS.

Deb Dahlberg
